DETAILED ACTION

Claims 1-14 are currently pending in the instant application. Claims 3 and 9-14 are withdrawn from further consideration as being drawn to non-elected subject matter. Claims 1-2 and 4-8 are objected.

Election/Restrictions

Applicant's election of Group I, claims 1-8 and the elected species of compound F-1a in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

With the identification of the above noted species, the examiner will identify a generic concept inclusive of said species, for examination along with the elected species. The generic concept is that of the compound of formula (I) as found in claim 1 wherein:

Q is imidazole,

Y₁ is a bonding hand or CH₂O,

n is 2-20,

Y₂ is an alkyl group substituted by
$$\begin{array}{c} \text{O} \\ || \\ -\text{Y}_3-\text{C}-\text{C}=\text{CH}_2 \\ | \\ \text{R}_2 \end{array}$$

m is 2-5

X⁺ is as found in claim 1,

R₂ is hydrogen or alkyl and

Y₃ is oxygen.

The remaining subject matter of claims 1-2 and 4-8 and the subject matter of claims 3 and 9-14 stands withdrawn, 37 CFR 1.142 (b), as being for non-elected inventions. The withdrawn subject matter of the claims is properly restricted as said subject matter differs materially in structure and element from the elected subject matter so as to be patentably distinct, i.e. a reference which anticipated but the elected subject matter would not even render obvious the non-elected subject matter. Additionally, the fields of search are not co-extensive.

Accordingly, the claims are drawn to more than a single invention and restriction as has been required is proper, 37 CFR 1.142 (a).

Claim Objections

Claims 1-8 are objected to as containing non-elected subject matter. The claims presented drawn solely to the elected subject matter as indicated supra, would appear allowable.
